EDUCATION

University of Florida, College of Liberal Arts and Sciences

Bachelor of Arts in Economics

April 2027

Gainesville, FL

- Dream Scholarship Recipient (\$70k per year)
- Dean's List: Summer 2024, Fall 2025

WORK EXPERIENCE

UF/IFAS Extension Marion County

August 2026 – Current

Technical Intern

Ocala, FL

- Helping strengthen volunteer education, digital communication, and citizen science initiatives that support Florida Friendly Landscaping, pollinator conservation, and community horticulture.
- Working on projects that improve how volunteers learn, communicate, and engage with the public through digital tools.

Department of Economics, University of Florida

May 2026 – August 2026

Research Assistant

Gainesville, FL

- Analyzed state statutes and education finance codes to map complex funding formula mechanics step-by-step, resulting in clearly defined statutory rules, student category weights, and required district inputs.
- Evaluated state department of education publications to locate parameter sources, document state-specific data requirements, and flag legal ambiguities for technical program specifications.

Fauna Conservation and Analytics

August 2024 – December 2024

Technical Intern

Jacksonville, FL

- Developed and managed integrated public and internal web platforms to optimize site architecture and content strategy, resulting in streamlined information delivery and enhanced stakeholder engagement.
- Analyzed bioacoustic datasets using Kaleidoscope Pro and Excel; synthesized findings into technical reports and data visualizations utilized by government agencies for environmental research and policy support.

UF College of Public Health & Health Professions, Occupational Therapy Lab

January 2024 – August 2024

Research Intern

Gainesville, FL

- Architected a research database by integrating participant demographics with biomechanical performance metrics and utilizing Python to automate data extraction, resulting in structured, analysis-ready formats synthesized from raw data files.
- Leveraged MATLAB to perform advanced statistical analysis on participant datasets, calculating critical kinetic variables such as rise time and variance; created data-driven spreadsheets for lab-wide research dissemination.

ACADEMIC RESEARCH

Lagged Relationships Between Sleep, Balance, and Cognition in Older Adults

January 2024 – August 2024

Co-Author

Gainesville, FL

- Led the research intern team to process articles for literature review. Extracted key information including methods, demographics, and analysis. constructed a summary chart by defining key takeaways from the review.
- Developed a protocol to guide senior living community participants in operating the wearable device and sleep diary, based on firsthand experience with the study process. Built a recruitment poster with study details.

PERSONAL PROJECT

Effectiveness of Learning Methods in Business Online Courses

August 2024 – December 2024

Student Researcher

Gainesville, FL

- Designed and administered a Qualtrics survey of 44 undergraduate students to evaluate the effectiveness of online learning methods in business courses; analyzed quantitative results using Excel and analysis of open-ended responses.
- Identified how asynchronous resources were most effective for learning, while synchronous methods and proctored exams showed lower engagement; highlighted the trade-off between flexibility and interaction in online education.
